DATA INTERPRETATION

This report contains tables of counts of deaths classified according to the cause of death and the age, race, and sex of the decedent for South Carolina residents.

This report supplements the annual publication, South Carolina Vital and Morbidity Statistics, Volume I. This Detailed Mortality Statistics report presents deaths allocated to the place of residence of the deceased, regardless of where the death occurred. The counts of deaths for each cause are shown for race-sex and age categories. Race categories are white and nonwhite; nonwhite is predominately Black (97 percent) in South Carolina.

Four age categories are shown for infants - less than 1 day, less than 1 week, less than 28 days and less than one year of age. These age categories are cumulative such that a death occurring during the first day of life is counted again in the three subsequent age categories. For deaths occurring at one year of age or older, counts are grouped into 5 or 10 year age intervals (age in completed years).

The cause of death is the underlying cause classified according to the ninth revision of the International Classification of Diseases (ICD). Counts of deaths are displayed for the detailed list of causes. Only sixty characters of the name of each cause category are printed. If there were no deaths in a particular category, the name is not printed. Complete descriptions of the cause categories are provided in the ICD.

In the tables in this report, the cause of death categories are ordered from the general to the specific. The 4-digit category is the most specific classification. A 3-digit category is the sum of 4-digit categories having the same first three digits. There are 900 possible 3-digit categories. A group of the categories is the sum of 3-digit categories with similar characteristics. There are 109 possible groups. The classification is arranged in seventeen major sections.

The following example illustrates the four levels of the cause of death hierarchy as shown in this report. Note that the order is the same as 1979-1987 and the reverse of that provided in the 1978 report.

LEVEL	ICD CODE	CATEGORY
Section	390-459	Disease of the Circulatory System
Group	415-417	Diseases of Pulmonary Circulation
3-Digits	415	Acute Pulmonary Heart Disease
4-Digits	4150	Acute Cor Pulmonale
	4151	Pulmonary Embolism

There have been several revisions of the International Classification of Diseases. Therefore, in comparing causes in this report to causes of death prior to 1979, the user should be aware of comparability ratios published by the National Center for Health Statistics, February 29, 1980 in the Monthly Vital Statistics Report, Vol. 28, No. 11.

EXCLUDED DATA

Six death certificates were dropped from the file producing this report for 1988 due to unknown values for selected variables. The characteristics of these certificates are listed below. These six certificates are included in the other mortality data published by the Office of Vital Records and Public Health Statistics.

Cause of Death	Race	Sex	Age at Death
E966	White	Female	Unknown
E964	Nonwhite	Female	Unknown
411	Nonwhite	Male	Unknown
203.0	Unknown	Female	61 Years
153.9	Unknown	Female	78 Years
153.9	Unknown	Female	89 Years
